

St1 is a Nordic energy company with a vision of becoming the leading producer and seller of CO2-aware energy. So far, St1 has bioethanol plants in Finland; an oil refinery in Gothenburg, Sweden; and service stations in Finland, Sweden and Norway.

The cornerstone of our business is the sale of liquid fuels for transport and heating use to consumers and the corporate sector. In the petrol station business, we have St1 and Shell networks, the latter under a license agreement.

Our strong performance in the traditional oil business enables us to invest in the future and to build a solid foundation for realizing our vision through renewable energy. We are already recycling waste for fuel and using wind power to produce electricity. In the spirit of our vision, each of our solutions must be technically and economically feasible and ecologically sustainable – today.

To strengthen our Nordic Business Technology team, we are looking for a permanent

MS Dynamics 365 Application Specialist (Finance)

In this role your main customers are our finance department end-users and business decision-makers from three Nordic countries. You will work together with the rest of our D365 application specialist team, IT infrastructure and architects to continuously improve and streamline the ERP application processes to bring greater benefits and value to our business. The main focus is on finance process area, but understanding the other related ERP application areas is crucial.

Key success factors in this role are:

- Good communicational skills and customer service oriented mindset
- Well-organized, systematic and prioritized way of working
- Ability to understand and capture E2E processes
- Either + 3 years of experience from using finance modules in AX2012 / Dynamics 365 for Operations **or** experience from consulting / configuring the abovementioned systems
- In-depth understanding of financial processes
- Readiness to occasional travel in Nordic countries
- Excellent English skills
- Fluency in Swedish, Finnish or Norwegian is considered an advantage
- Experience from end-user training is considered as a merit

Your main tasks are to:

- Provide training and advice to the users for the process matters and tool related questions
- Solve issues and support business end-users in their day-to-day work
- Based on the feedback from end users create development proposals for improving the current finance process in the system together with the BT finance team
- Testing the developed improvements as well as new finance processes that are implemented either in projects or as a part of continuous development
- Develop and maintain financial tool/application and process specific documentation and guides
- Organize and lead trainings for end-users either as a bigger class-room type training or even one-to-one guiding

The position is located in Helsinki or Stockholm and requires occasional travel to other Nordic countries.

We offer you:

- An interesting position in a reputable, growing and innovative Nordic company
- Good chances to influence your own job
- Ongoing training and development possibilities
- Competitive compensation

The position will be filled as soon as possible.

Please submit your application and CV along with a salary request latest on 26th July to ERPCareer@st1.fi
